Get *Off The Roof* Protection with

ROOF Guardian™

Rooftop Grease Containment Filter

Replacement absorbent grease filter systems for roof mount grease containment products. Use The Roof Guardian™ in applications where a Grease Gutter™ won't work.

The Roof Guardian™ has a state of the art four layered grease filtration system to help keep your roof grease free;

The porous top layer filter helps grease disperse evenly to the lower filter levels

The second layer hydrophobic material, catches and absorbs grease while allowing water to run through.

The third plastic backed middle absorbent adds Extra rooftop protection.

The fourth and final layer of protection is of the same material as the top layer and keeps grease saturated filters off of the roof.

Available in all sizes to accommodate ANY BRAND of roof mounted ventilator grease containment systems.
